I have been notified that the Integrated Pest Management Working Group (IPM-WG), is a group of collection managers, conservators and other professionals interested in issues surrounding the implementation of integrated pest management in museums and other collection-holding institutions with the goal of promoting and facilitating good IPM practices and collaboration between staff and institutions through the development and on-line distribution of training materials and other resources. The mechanism for distribution of online resources is the *MuseumPests.net* website developed and maintained by IPM-WG.

I understand that *MuseumPests.net* is an Internet resource covering all aspects of integrated pest management in museums and other collection-holding institutions. The website will include examples of institutional pest management policies, training documents, conference presentations relating to pest management case studies, reference articles, links to useful sites, and other materials useful for IPM workers and will be available free of charge to website users worldwide.

Please sign below and return one copy to us as soon as possible.
